

This Fall we are offering a straw bale group buy in. Straw bales are perfect for laying on your garden plot at the end of the season to prevent weeds from taking over during our mild winters. One straw bale should cover a 10x40 plot depending on the size and makeup of your garden.

Here is a link on how to use straw in the garden:

<http://www.doityourself.com/stry/7-reasons-to-use-straw-as-mulch>

We will be buying 2 string bales. (Note: These bales weigh 40-50 pounds and you may need help lifting it.) You should pick up your straw ASAP, if it gets wet it will weigh even more and may grow moldy. Straw not picked up after 2 weeks(by October 17th) will be donated to the food bank.

I am planning for a delivery during the first week of October, the cost is \$ 18 per bale.

Payment must be made via Paypal to mcgaboard@gmail.com. We will also be taking credit and debit card payments at various work parties. Once your payment is received you will get an email confirmation from Gia.

Please send the money as a friend and not to a business or else you will have to pay an extra fee. Last day to purchase straw will be Friday, September 28th, 2018.
